Projects

RebateHub – Cashback Tracking Platform | *Spring Boot, Spring Security, JWT, MySQL, Spring Data JPA, Flyway, Docker* | *Live Link* **Aug 2026 - Present**

- Built a **REST API** in Spring Boot with **44 endpoints** for a cashback platform, covering user wallets, store catalog, transactions, withdrawals, and a full admin panel.
- Implemented **dual-token authentication** (JWT access tokens + **rotating SHA-256-hashed** refresh tokens) and email-OTP verification, enforcing role-based access with brute-force and OTP-lockout protection.
- Designed a **9-table MySQL schema** with Flyway migrations and JPA Specifications-based dynamic filtering, powering a **transaction-to-withdrawal claiming system** for accurate wallet balance accounting.
- Tested the backend with **170 integration tests** using Testcontainers MySQL; deployed via multi-stage Docker to **Render**, with MySQL on Aiven and the frontend live on Vercel.

Achievers Zone – Institute Management System |*Spring Boot, Spring Security, JWT, MySQL, Spring Data JPA, Flyway, Testcontainers* | *Live Link* **Jun 2026 - Aug 2026**

- Engineered a production **REST API** in Spring Boot with **41 endpoints** for a live computer training institute, covering courses, faculty, batches, students, enquiries and dashboard analytics.
- Architected stateless authentication with Spring Security and **JWT access/refresh tokens**, enforcing **role-based access** for Admin and Faculty endpoints and re-validating account status on every token refresh.
- Hardened the API against brute-force and abuse with per-account and per-IP **rate limiting** on login and the public enquiry form, **BCrypt password hashing**, timing-safe credential checks, and API docs disabled in production.
- Modeled a relational MySQL schema with Spring Data JPA and Flyway migrations, using Specification-based filtering, pagination and **Caffeine caching**, plus **Cloudinary** integration for image storage.
- Validated the backend with **75 JUnit tests**, including Testcontainers integration tests on a real MySQL database, and deployed it on **Railway** with automatic GitHub deployments, fixing post-launch CORS and caching issues found through live testing.

Certificates

Industry-Ready Java Spring Boot: Cloud, and Spring AI **Jun 2026 - Present**
Udemy

Getting started with Java Programming **Apr 2024**
Brain Mentors – Certificate Link

Achievements

Reliance Foundation Undergraduate Scholarship (1.5 lakhs) **Aug 2022 - May 2025**
Awarded under a national merit scholarship based on academic performance and an aptitude test.

Technical Skills

Languages: Java, SQL

Backend & Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate, JWT (JJWT), REST API Design

Databases: MySQL

Testing: JUnit 5, Testcontainers, MockMvc

Tools & DevOps: Git, GitHub, Maven, Docker, Postman

Deployment Platforms: Railway, Render, Vercel, Aiven

Domain Skills: Object-Oriented Programming (OOP), Data Structures and Algorithms, System Design Basics, Problem Solving

Education

Lovely Professional University **2025 - 2027**
Master of Computer Applications — CGPA: 8.44 *Jalandhar, Punjab*

Dehradun Institute of Technology **2022 - 2025**
Bachelor of Computer Applications — CGPA: 8.84 *Dehradun, Uttarakhand*

Aditya Narayan Inter College **2021 - 2022**
12th with Science — Percentage: 75.60% *Dumka, Jharkhand*
